What is software project **success**?

Happy, **satisfied**, profitable customers?
 Happy, productive, **proud** team?
Profitable organization?

Defect-free software released **on time**?

Success is:

- » achieving the project's objectives.

Why aren't **more** projects successful?

Many reasons, ... plausible excuses.

Success =

- » Build the **right software** +
- » Build the software the **right way**.

This talk focuses on **Development & QA**.

Build a Contrarian Team and Keep it Together

Hiring Rule #1:

- » Find people with a **variety** of points of view.

Hiring Rule #2:

- » “Smart, **Disciplined**, and Gets Things Done!”

Change the assignments, but don't change the team.

What are the fundamentals?

Coupling

- » is the relationship between software parts

Cohesion

- » the degree to which the responsibilities of a single part are logical and consistent

Cyclomatic complexity

- » the number of the linearly independent paths through a program's source code

Plan Your Work, Review, Adjust, Replan

Why?

- » The plan is the basis of **commitments**.
- » To be successful you must be able to make commitments that you can meet—at a profit.

What is a plan?

- » A **solution** embedded in a **list of tasks** for the work that needs to be done to achieve the desired outcome.

How?

- » Plan in **detail**. Task length: 45-90 minutes.

Manage the physical design and packaging

Physical design

- » addresses the issues surrounding the physical entities of a system (e.g., files, directories, and libraries) as well as organizational issues.

Lakos, John. Large Scale C++ Program Design. Addison-Wesley. Reading, MA. 1996.

Release early! Release often!

Release

- » The action of making a product available for general purchase.
- » ...from one phase to the next...
- » Make it mean something!
- » Make it mean: **DONE!**

4 June 2011 © 2002-2011 Steven Teleki. All rights reserved. 22

StevenTeleki Building Blocks of Software Project Success
Home | Success | Blocks | Team | Fundamentals | Plan | Package | Release | Automate | Measure | Learn | Conclusion

Automate, Automate, Automate!

There is no reason for a human to do something twice that can be automated!

Automate:

- » Build (multiple times a day)
- » BVT, FVT, SVT (daily)
- » End-to-End user test scenarios (daily)
- » Release processes (weekly)

Track Effective On-Task Time (EOT)

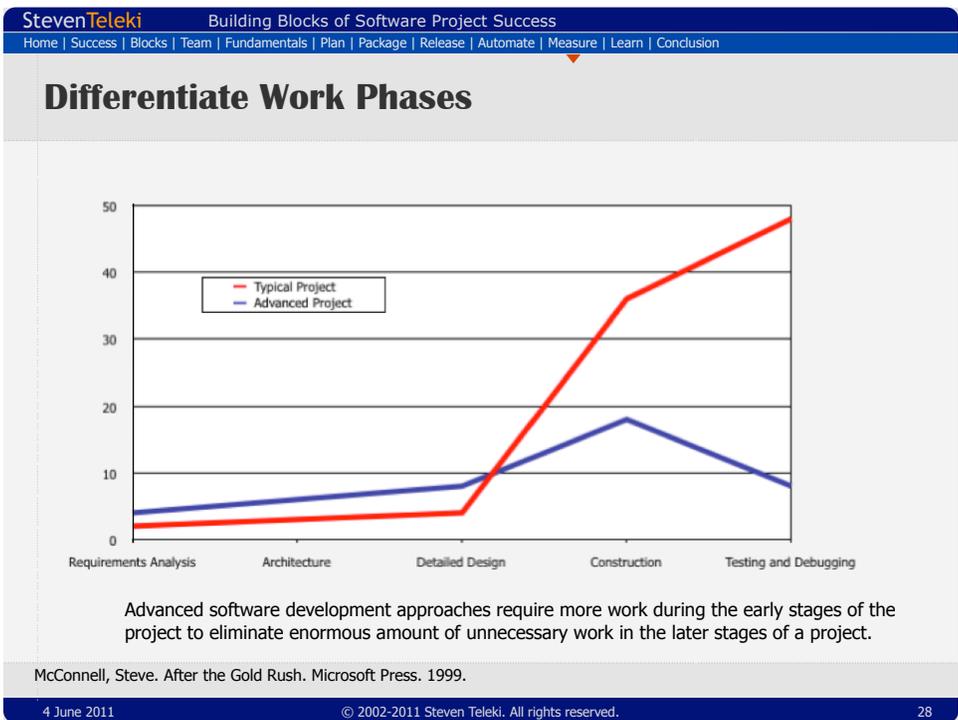

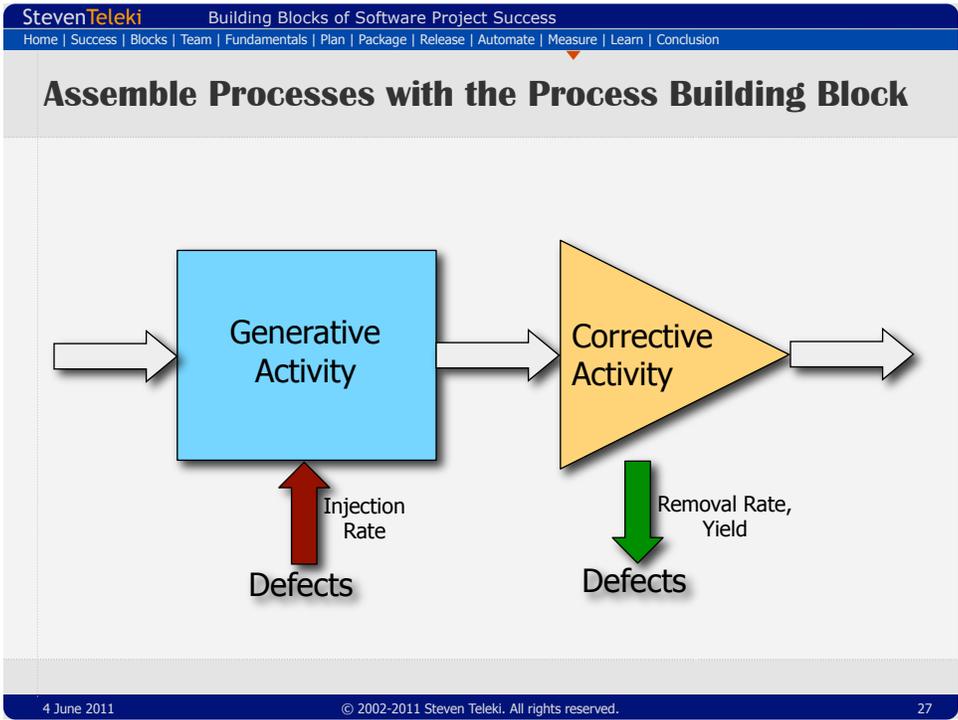

The time **effectively** spent on project work.
 Doesn't include:

- » Reading email (usually even if it is project related)
- » Meetings (except well-defined project meetings)
- » Lunch time, breaks, phone conversations, etc.

Measure your EOT per week.

- » Best organizations in the world get **20+ hrs/week**.
- » You may only get about 3-5 hrs/wk the first week.
 You should get up to 15 hrs/wk in a few weeks.

DISTINCT ... OR EXTINCT!

“If there is nothing very special about your work, no matter how hard you apply yourself, you won’t get noticed and that increasingly means you won’t get paid much, either.”

Michael Goldhaber, Wired

4 June 2011 © 2002-2011 Steven Teleki. All rights reserved. 30

Focus on Your Talents

What is a talent?

“A talent is a recurring pattern of thought, feeling, or behavior that can be productively applied.”

Every role performed *at excellence* requires talent.

“Michelangelos of housekeeping.”

Buckingham, Marcus, Curt Coffman. First, Break All The Rules. Simon & Schuster. NY, NY. 1999.
 Peters, Thomas J. The Circle of Innovation. Random House. New York, NY. 1997.

**“In every human activity
 the law of the farm
 governs.”**

**“There is no cramming
 on the farm.”**

Corn Granary, Eastern Europe, 2007

Stephen R. Covey
